Managing Agent Coastal Transportation, Inc. 4025 13th Ave W Seattle, WA 98119-1350

Re: NOTICE OF INTENT TO SUE UNDER THE CLEAN WATER ACT AND REQUEST FOR COPY OF STORMWATER POLLUTION PREVENTION PLAN

Dear Managing Agent:

We represent Waste Action Project, P.O. Box 9281, Covington, WA 98042, (206) 849-5927. Any response or correspondence related to this matter should be directed to us at the letterhead address. This letter is to provide you with sixty days notice of Waste Action Project's intent to file a citizen suit against Coastal Transportation, Inc. ("Coastal") under section 505 of the Clean Water Act ("CWA"), 33 U.S.C. § 1365, for the violations described below. This letter is also a request for a copy of the complete and current stormwater pollution prevention plan ("SWPPP") required by Coastal's National Pollution Discharge Elimination System ("NPDES") permit.

Coastal was granted coverage under Washington's Industrial Stormwater General Permit issued by the Washington Department of Ecology ("Ecology") on October 21, 2009, effective January 1, 2010, modified May 16, 2012, effective July 1, 2012, and set to expire on January 1, 2015, under National Pollutant Discharge Elimination System Permit No. WAR000400 (the "2010 Permit"). Ecology granted Coastal coverage under the current iteration of the ISGP, issued by Ecology on December 3, 2014, effective January 2, 2015, and set to expire on December 31, 2019 (the "2015 Permit") and maintains the same permit number, WAR000400.

Coastal has violated and continues to violate the CWA (see Sections 301 and 402 of the CWA, 33 U.S.C. §§ 1311 and 1342) and the terms and conditions of the 2010 Permit and the 2015 Permit (collectively, the "Permits") with respect to operations of, and discharges of stormwater and pollutants from, its transportation facility located at or about 4025 13th Ave W, Seattle, WA 98119-1350, (the "facility") as described herein, to Salmon Bay and the Lake Washington Ship Canal. The facility subject to this notice includes any contiguous or adjacent or otherwise appurtenant properties owned or operated by Coastal.

I. COMPLIANCE WITH STANDARDS.

A: Violations of Water Quality Standards.

Condition S10.A of the Permits prohibits discharges that cause or contribute to violations of water quality standards. Water quality standards are the foundation of the CWA and Washington's efforts to protect clean water. In particular, water quality standards represent the U.S. Environmental Protection Agency ("EPA") and Ecology's determination, based on scientific studies, of the thresholds at which pollution starts to cause significant adverse effects on fish or other beneficial uses. For each water body in Washington, Ecology designates the "beneficial uses" that must be protected through the adoption of water quality standards.

A discharger must comply with both narrative and numeric criteria water quality standards. WAC 173-201A-010; WAC 173-201A-510 ("No waste discharge permit can be issued that causes or contributes to a violation of water quality criteria, except as provided for in this chapter."). Narrative water quality standards provide legal mandates that supplement the numeric criteria. Furthermore, the narrative water quality standard applies with equal force even if Ecology has established a numeric water quality standard. Specifically, Condition S10.A of the Permits require that Coastal's discharges not cause or contribute to an excursion of Washington State water quality standards.

Coastal discharges to Salmon Bay and the Lake Washington Ship Canal via the surface flow and the onsite storm drain system. Salmon Bay and the Lake Washington Ship Canal do not meet water quality standards for lead, aldrin, pH, and bacteria and are included on the state's "303(d) list" of impaired water bodies. Benchmark levels are pollutant concentration levels used as an indicator for likelihood to cause a water quality violation. Coastal discharges stormwater that contains elevated levels of turbidity, copper, zinc, and levels of pH outside of the benchmark range as indicated in the table of benchmark exceedances below. These discharges cause and/or contribute to violations of water quality standards for turbidity, pH, copper, zinc, and aesthetics in Salmon Bay and the Lake Washington Ship Canal and have occurred each and every day during the last five years on which there was 0.1 inch or more of precipitation, and continue to occur. See WAC 173-201A-600(1)(a)(ii); WAC 173-201A-200(1)(b)(Aquatic Life general criteria), (e)(Aquatic life turbidity criteria); (g)(Aquatic life PH criteria); (2)(a)(recreational uses general criteria),(b)(water contact recreation bacteria criteria), (4)(General criteria for toxic and aesthetic materials and values for uses including boating and aesthetics); WAC 173-201A-240 (Toxic substances, including criteria for copper and zinc); WAC 173-201A-260 (natural conditions and other water quality criteria and applications, including toxics and aesthetics criteria). Precipitation data from that time period is appended to this notice of intent to sue.

Table 1: Benchmark Exceedances with Outfall identifier

Quarter in which sample collected	Turbidity (Benchmark 25 NTU)	pH (Benchmark 5.0-9.0)	Copper (Benchmark 14 ug/L)	Zn (Benchmark 117 ug/L)	Oil Sheen (Benchmark "No sheen")
1st Quarter 2013	75.1 (PD2)	7.1	14.5 (PD1)		
2nd Quarter 2013			23.0 (PD1),		
			26.2 (PD2)		
3rd Quarter 2013		4.0 (PD1),			
		4.0 (PD2)			
1st Quarter 2014	31.9 (PD2)		49.7 (PD1),		
			26.1 (PD2)		
2nd Quarter 2014		10.1 (PD1),	14.2 (PD1)		
		10.18 (PD2)			
3rd Quarter 2014				187 (PD1)	
1st Quarter 2015			24.2 (PD1),		
			21.1 (PD2)		
1st Quarter 2016			27.7 (PD1)		
4th Quarter 2016	27.4 (PD1)				
1st Quarter 2018			21 (PD1)		
3rd Quarter 2018					Yes (PD2)
4th Quarter 2018	34.7 (PD1),		32.8 (PD1), 17.0 (PD2)		

B. Compliance with Standards.

Condition S10.C of the Permits requires Coastal to apply all known and reasonable methods of prevention, control and treatment ("AKART") to all discharges, including preparation and implementation of an adequate SWPPP and best management practices ("BMPs"). Coastal has violated and continues to violate these conditions by failing to apply AKART to its discharges or to implement an adequate SWPPP and BMPs as evidenced by the elevated levels of pollutants in its discharge indicated in the table above and as described below in this notice of intent to sue.

Condition S1.A of the Permits requires that all discharges and activities authorized be consistent with the terms and conditions of the permits. Coastal has violated these conditions by discharging and acting inconsistent with the conditions of the Permits as described in this notice of intent to sue.

II. STORMWATER POLLUTION PREVENTION PLAN VIOLATIONS.

1. Condition S3.A.1 of the Permits requires Coastal to develop and implement a SWPPP as specified. Condition S3.A.2 of the Permits require the SWPPP to specify BMPs necessary to provide AKART and ensure that discharges do not cause or contribute to violations of water quality standards. On information and belief, Coastal has violated these requirements of the Permits each and every day during the last five years and continues to

violate them as it has failed to prepare and/or implement a SWPPP that includes AKART BMPs and BMPs necessary to comply with state water quality standards.

- 2. Condition S3.A of the Permits requires Coastal to have and implement a SWPPP that is consistent with permit requirements, fully implemented as directed by permit conditions, and updated as necessary to maintain compliance with permit conditions. On information and belief, Coastal has violated these requirements of the Permits each and every day during the last five years and continues to violate them because its SWPPP is not consistent with permit requirements, has not been fully implemented and has not been updated as necessary.
- 3. The SWPPP fails to satisfy the requirements of Condition S3 of the Permits because it does not adequately describe BMPs. Condition S3.B.4 of the Permits require that the SWPPP include a description of the BMPs that are necessary for the facility to eliminate or reduce the potential to contaminate stormwater. Condition S3.A.3 of the Permits require that the SWPPP include BMPs consistent with approved stormwater technical manuals such as the Stormwater Management Manual for Western Washington, as amended in December 2014 (https://fortress.wa.gov/ecy/madcap/wq/2014SWMMWWinteractive/2014%20SWMM WW.htm) or document how stormwater BMPs included in the SWPPP are demonstratively equivalent to the practices contained in the approved stormwater technical manuals, including the proper selection, implementation, and maintenance of all applicable and appropriate BMPs. Coastal's SWPPP does not comply with these requirements because it does not adequately describe BMPs and does not include BMPs consistent with approved stormwater technical manuals nor does it include BMPs that are demonstratively equivalent to such BMPs with documentation of BMP adequacy.
- 4. Coastal's SWPPP fails to satisfy the requirements of Condition S3.B.2 of the Permits because it fails to include a facility assessment as mandated. The SWPPP fails to include an adequate facility assessment because it does not describe the industrial activities conducted at the site, the general layout of the facility including buildings and storage of raw materials, the flow of goods and materials through the facility, regular business hours and seasonal variations in business hours or in industrial activities as required.
- 5. Coastal's SWPPP fails to satisfy the requirements of Condition S3.B.1 of the Permits because it does not include a site map that identifies significant features, the stormwater drainage and discharge structures, the stormwater drainage areas for each stormwater discharge point off-site, a unique identifying number for each discharge point, each sampling location with a unique identifying number, paved areas and buildings, areas of pollutant contact associated with specific industrial activities, conditionally approved non-stormwater discharges, surface water locations, areas of existing and potential soil erosion, vehicle maintenance areas, and lands and waters adjacent to the site that may be helpful in identifying discharge points or drainage routes.
- 6. Coastal's SWPPP fails to comply with Condition S3.B.2.b of the Permits because it does not include an inventory of industrial activities that identifies all areas associated with industrial activities that have been or may potentially be sources of pollutants as required.

The SWPPP does not identify all areas associated with loading and unloading of dry bulk materials or liquids, outdoor storage of materials or products, outdoor manufacturing and processing, onsite dust or particulate generating processes, on-site waste treatment, storage, or disposal, vehicle and equipment fueling, maintenance, and/or cleaning, roofs or other surfaces exposed to air emissions from a manufacturing building or a process area, and roofs or other surfaces composed of materials that may be mobilized by stormwater as required by these conditions.

- 7. Coastal's SWPPP does not comply with Condition S3.B.2.c of the Permits because it does not include an adequate inventory of materials. The SWPPP does not include an inventory of materials that lists the types of materials handled at the site that potentially may be exposed to precipitation or runoff and that could result in stormwater pollution, a short narrative for material describing the potential for the pollutants to be present in stormwater discharge that is updated when data becomes available to verify the presence or absence of the pollutants, a narrative description of any potential sources of pollutants from past activities, materials and spills that were previously handled, treated, stored, or disposed of in a manner to allow ongoing exposure to stormwater as required. The SWPPP does not include the method and location of on-site storage or disposal of such materials and a list of significant spills and significant leaks of toxic or hazardous pollutants as these permit conditions require.
- 8. Coastal's SWPPP does not comply with Condition S3.B.3 of the Permits because it does not identify specific individuals by name or title whose responsibilities include SWPPP development, implementation, maintenance and modification.
- 9. Condition S3.B.4 of the 2010 Permit required that permittees include in their SWPPs and implement certain mandatory BMPs no later than July 1, 2010 unless site conditions render the BMP unnecessary, infeasible, or an alternative and equally effective BMP is provided. Condition S3.B.4 of the 2015 Permit also requires that permittees include in their SWPPs and implement mandatory BMPs subject to the same conditions. Coastal is in violation of this requirement because it has failed to include in its SWPPP and implement the mandatory BMPs of the Permits.
- 10. Coastal's SWPPP does not comply with Condition S3.B.4.b.i of the Permits because it does not include required operational source control BMPs in the following categories: good housekeeping (including definition of ongoing maintenance and cleanup of areas that may contribute pollutants to stormwater discharges, and a schedule/frequency for each housekeeping task); preventive maintenance (including BMPs to inspect and maintain stormwater drainage, source controls, treatment systems, and plant equipment and systems, and the schedule/frequency for each task); spill prevention and emergency cleanup plan (including BMPs to prevent spills that can contaminate stormwater, for material handling procedures, storage requirements, cleanup equipment and procedures, and spill logs); employee training (including an overview of what is in the SWPPP, how employees make a difference in complying with the SWPPP, spill response procedures, good housekeeping, maintenance requirements, and material management practices, how training will be conducted, the frequency/schedule of training, and a log of the dates on which specific employees received training); inspections and recordkeeping (including documentation of

Notice of Intent to Sue - 5

procedures to ensure compliance with permit requirements for inspections and recordkeeping, identification of personnel who conduct inspections, provision of a tracking or follow-up procedure to ensure that a report is prepared and appropriate action taken in response to visual monitoring, definition of how Coastal will comply with signature and record retention requirements, and certification of compliance with the SWPPP and Permit).

- 11. Coastal's SWPPP does not comply with Condition S3.B.4.b.i.7 of the Permits because it does not include measures to identify and eliminate the discharge of process wastewater, domestic wastewater, noncontact cooling water, and other illicit discharges to stormwater sewers, or to surface waters and ground waters of the state.
- 12. Coastal's SWPPP does not comply with Condition S3.B.4.b.ii of the Permits because it does not include required structural source control BMPs to minimize the exposure of manufacturing, processing, and material storage areas to rain, snow, snowmelt, and runoff. Coastal's SWPPP does not comply with Condition S3.B.4.b.iii of the Permits because it does not include treatment BMPs as required.
- 13. Coastal's SWPPP fails to comply with Condition S3.B.4.b.v of the Permits because it does not include BMPs to prevent the erosion of soils or other earthen materials and prevent off-site sedimentation and violations of water quality standards.
- 14. Coastal's SWPPP fails to satisfy the requirements of Condition S3.B.5 of the Permits because it fails to include a stormwater sampling plan as required. The SWPPP does not include a sampling plan that: identifies points of discharge to surface waters, storm sewers, or discrete ground water infiltration locations; documents why each discharge point is not sampled; identifies each sampling point by its unique identifying number; identifies staff responsible for conducting stormwater sampling; specifies procedures for sampling collection and handling; specifies procedures for sending samples to the a laboratory; identifies parameters for analysis, holding times and preservatives, laboratory quantization levels, and analytical methods, and that specifies the procedure for submitting the results to Ecology.

III. MONITORING AND REPORTING VIOLATIONS.

A. Failure to Collect Quarterly Samples.

Condition S4.B of the Permits requires Coastal to collect a sample of its stormwater discharge once during every calendar quarter. Conditions S3.B.5.b and S4.B.2.c of the Permits require Coastal to collect stormwater samples at each distinct point of discharge offsite except for substantially identical outfalls, in which case only one of the substantially identical outfalls must be sampled. These conditions set forth sample collection criteria, but require the collection of a sample even if the criteria cannot be met. On information and belief, the facility has at least two distinct points of discharge off-site: Outfall PD1 and Outfall PD2. On information and belief, there are additional unnamed distinct discharge points.

Coastal violated these requirements by failing to collect stormwater samples at any of its discharge points during the following quarters:

- 1. 4Q 2014
- 2. 2Q 2015
- 3. 4Q 2015
- 4. 2Q 2016
- 5. 1Q 2017
- 6. 2Q 2017
- 7. 30 2017
- 8. 40 2017
- 9. 1Q 2019

B. Failure to Collect Quarterly Samples from All Points of Discharge.

Coastal has also violated and continues to violate these conditions because it does not sample each distinct point of discharge off-site. These violations have occurred and continue to occur each and every quarter during the last five years that Coastal was and is required to sample its stormwater discharges. These violations will continue until Coastal commences monitoring all distinct points of discharge.

C. Failure to Analyze Quarterly Samples.

Condition S5.A.1 of the Permits requires Coastal to analyze stormwater samples collected quarterly for turbidity, pH, total copper, total zinc, and petroleum hydrocarbons. Coastal violated these conditions by failing to analyze stormwater sample in Q1 2014 for pH at outfalls PD1 and PD2.

D. Failure to Comply with Visual Monitoring Requirements.

Condition S7.A of the Permits requires that monthly visual inspection be conducted at the facility by qualified personnel. Each inspection is to include observations made at stormwater sampling locations and areas where stormwater associated with industrial activity is discharged, observations for the presence of floating materials, visible oil sheen, discoloration, turbidity, odor, etc. in the stormwater discharges, observations for the presence of illicit discharges, a verification that the descriptions of potential pollutant sources required by the permit are accurate, a verification that the site map in the SWPPP reflects current conditions, and an assessment of all BMPs that have been implemented (noting the effectiveness of the BMPs inspected, the locations of BMPs that need maintenance, the reason maintenance is needed and a schedule for maintenance, and locations where additional or different BMPs are needed).

Condition S7.C of the Permits requires that Coastal record the results of each inspection in an inspection report or checklist that is maintained on-site and that documents the observations, verifications, and assessments required. The report/checklist must include the time and date of the inspection, the locations inspected, a statement that, in the judgment

of the person conducting the inspection and the responsible corporate officer, the facility is either in compliance or out of compliance with the SWPPP and the Permits, a summary report and schedule of implementation of the remedial actions that Coastal plans to take if the site inspection indicates that the facility is out of compliance, the name, title, signature and certification of the person conducting the facility inspection, and a certification and signature of the responsible corporate officer or a duly authorized representative.

Coastal is in violation of these requirements of Condition S7 of the Permits because, during the last five years, it has failed to conduct each of the requisite visual monitoring and inspections, failed to prepare and maintain the requisite inspection reports or checklists, and failed to make the requisite certifications and summaries, including when the facility failed to monitor for Oil Sheen in Quarter 1, 2014.

IV. CORRECTIVE ACTION VIOLATIONS.

A. Violations of the Level One Requirements.

Condition S8.B of the Permits requires Coastal take specified actions, called a "Level One Corrective Action," each time quarterly stormwater sample results exceed a benchmark value or are outside the benchmark range for pH.

As described by Condition S8.B of the Permits, a Level One Corrective Action requires Coastal: (1) review the SWPPP for the facility and ensure that it fully complies with Condition S3 of the Permits and contains the correct BMPs from the applicable Stormwater Management Manual; (2) make appropriate revisions to the SWPPP to include additional operational source control BMPs with the goal of achieving the applicable benchmark values in future discharges and sign and certify the revised SWPPP in accordance with Condition S3.A.6 of the Permits; and (3) summarize the Level One Corrective Action in the Annual Report required under Condition S9.B of the Permits. Condition S8.B.4 of the Permits require Coastal implement the revised SWPPP as soon as possible, and no later than the DMR due date for the quarter the benchmark was exceeded.

Condition S5.A and Table 2 of the Permits establishes the following benchmarks: turbidity 25 NTU; pH 5 – 9 SU; total copper 14 μ g/L; and total zinc 117 μ g/L. Condition S5.B and Table 3 of the Permits establish the following additional benchmarks for Standard Industrial Classification (SIC) code 4425 that are applicable to Coastal: petroleum hydrocarbons (diesel fraction), 10 mg/L.

Coastal has violated the requirements of the Permits described above by failing to conduct a Level One Corrective Action in accordance with permit conditions, including the required review, revision and certification of the SWPPP, the required implementation of additional BMPs, and the required summarization in the annual report each time since January 1, 2012, its quarterly stormwater sampling results were greater than a benchmark or outside the benchmark range for pH, including the benchmark excursions listed in Table 1 above.

B. Violations of the Level Two Requirements.

Condition S8.C of the Permits requires Coastal take specified actions, called a "Level Two Corrective Action," each time quarterly stormwater sample results exceed an applicable benchmark value or are outside the benchmark range for pH for any two quarters during a calendar year.

As described by Condition S8.C of the Permits, a Level Two Corrective Action requires Coastal: (1) review the SWPPP for the facility and ensure that it fully complies with Condition S3 of the Permits; (2) make appropriate revisions to the SWPPP to include additional structural source control BMPs with the goal of achieving the applicable benchmark value(s) in future discharges and sign and certify the revised SWPPP in accordance with Condition S3.A.6 of the Permits; and (3) summarize the Level Two Corrective Action (planned or take) in the Annual Report required under Condition S9.B of the Permits. Condition S8.C.4 of the Permits require Coastal implement the revised SWPPP according to condition S3 of the Permits and the applicable stormwater management manual as soon as possible, and no later than September 30th of the following year.

The Permits establish the benchmarks applicable to Coastal described in section IV.A of this notice of intent to sue letter.

Coastal has violated the requirements of the Permits described above by failing to conduct a Level Two Corrective Action in accordance with permit conditions, including the required review, revision and certification of the SWPPP, the required implementation of additional BMPs, including additional structural source control BMPs, and the required summarization in the annual report each time since January 1, 2012, its quarterly stormwater sampling results were greater than a benchmark or outside the benchmark range for pH for any two quarters during a calendar year. As indicated in Table 1 above, these violations include, but are not limited to, Coastal's failure to fulfill these Level Two Corrective Action obligations for copper triggered by its stormwater sampling during calendar year 2013, 2014, and 2018.

V. EFFLUENT LIMITATION VIOLATIONS.

Condition S6.C.1 of the 2015 Permit requires Permittees discharging to a "303(d)-listed" waterbody (Water Quality Category 5), either directly or indirectly through a stormwater drainage system must comply with the applicable sampling requirements and numeric effluent limits in Table 6 of the 2015 Permit. The "applicable sampling requirements and numeric effluent limits" means the sampling and effluent limits in Table 6 that correspond to the specific parameter(s) the receiving water is 303(d)-listed for at the time of permit coverage, or Total Suspended Solids (TSS) if the waterbody is 303(d)-listed for sediment quality at the time of permit coverage. Condition S6.C.1 of the 2010 Permit contained substantially identical requirements, but refers to Table 5 of that Permit.

Coastal discharges to Salmon Bay, which is 303(d)-listed for lead, aldrin, pH, and bacteria. Coastal's discharges are subject to a daily effluent limitation range of 6.0 to 8.5 for

pH. Coastal discharges stormwater that contains levels of pH outside the corresponding numeric effluent limitation, including on June 16, 2014, at outfalls PD1 and PD2, where discharge pH level reported was 10.1 SU and 10.18 SU, respectively. Each and every one of these discharges is a separate violation of the Permits. On information and belief, these numeric effluent limitation violations also occurred each and every day over the past five years on which there is at least 0.1 inch of precipitation in a 24 hour period and are reasonably likely to recur. Precipitation data from that time period is appended to this notice of intent to sue.

VI. PROHIBITED AND ILLICIT DISCHARGES.

Condition S5.F of the Permits requires Coastal to manage stormwater to prevent the discharge of synthetic, natural or processed oil or oil containing products as identified by an oil sheen, and trash and floating debris, prohibiting those discharges. Coastal's discharges of synthetic, natural or processed oil or oil containing products violate this Permit condition. On information and belief, these prohibited discharges occurred each and every day over the past five years Coastal operated and are reasonably likely to continue to occur.

Appendix 2 of the Permits defines "illicit discharge" as any discharge that is not composed entirely of stormwater. Illicit discharges are associated with several conditions in the Permit.

Condition S7.B.3.a of the Permits requires Coastal to notify the Department of Ecology within seven days of any discovery of an illicit discharge. Coastal violated this requirement by failing to notify Ecology about its illicit discharges within seven days of each occurrence over the past five years.

Condition S7.B.3.b of the Permits requires Coastal to eliminate illicit discharges within 30 days of discovery. Coastal has violated and continues to violate this requirement by failing to eliminate illicit discharges within 30 days of discovery.

Condition S3.B.4.b.i.7 of the Permits require Coastal's SWPPP to include measures to identify and eliminate illicit discharges to surface waters. Coastal has violated and continues to violate this requirement by failing to include and/or implement measures in its SWPPP to identify and eliminate illicit discharges to surface waters.

VII. VIOLATIONS OF THE ANNUAL REPORT REQUIREMENTS.

Condition S9.B of the Permits requires Coastal to submit an accurate and complete annual report to Ecology no later than May 15 of each year. The annual report must include corrective action documentation as required in Condition S8.B – D of the Permits. If a corrective action is not yet completed at the time of submission of the annual report, Coastal must describe the status of any outstanding corrective action. Specific information to be included in the annual report is identification of the conditions triggering the need for corrective action, description of the problem and identification of dates discovered, summary of any Level 1, 2, or 3 corrective actions completed during the previous calendar year,

including the dates corrective actions completed, and description of the status of any Level 2 corrective actions triggered during the previous calendar year, including identification of the date Coastal expects to complete corrective actions.

Coastal has violated this condition. Coastal failed to submit an annual report for calendar year 2018 as required by May 15, 2019. The annual reports submitted by 2014, 2015, 2016, and 2017 were not submitted timely and do not include the required information. For example, the reports do not identify the condition triggering the need for corrective action review, describe the problem(s) and identify the dates they were discovered, summarize corrective actions completed, and describe the status of Level 2 or 3 corrective actions triggered and expected date of completion.

VIII. VIOLATIONS OF THE RECORDKEEPING REQUIREMENTS.

A. Failure to Record Information.

Condition S4.B.3 of the Permits requires Coastal record and retain specified information for each stormwater sample taken, including the sample date and time, a notation describing if Coastal collected the sample within the first 30 minutes of stormwater discharge event, an explanation of why Coastal could not collect a sample within the first 30 minutes of a stormwater discharge event, the sample location, method of sampling and of preservation, and the individual performing the sampling. Upon information and belief, Coastal is in violation of these conditions as it has not recorded each of these specified items for each sample taken during the last five years.

B. Failure to Retain Records.

Condition S9.C of the Permits requires Coastal to retain for a minimum of five years a copy of the current Permit, a copy of Coastal's coverage letter, records of all sampling information, inspection reports including required documentation, any other documentation of compliance with permit requirements, all equipment calibration records, all BMP maintenance records, all original recordings for continuous sampling instrumentation, copies of all laboratory results, copies of all required reports, and records of all data used to complete the application for the Permit. Upon information and belief, Coastal is in violation of these conditions because it has failed to retain records of such information, reports, and other documentation during the last five years.

IX. FAILURE TO REPORT PERMIT VIOLATIONS.

Condition S9.E of the Permits requires Coastal to take certain actions in the event Coastal is unable to comply with any of the terms and conditions of the Permits which may endanger human health or the environment, or exceed any numeric effluent limitation in the permit. In such circumstances, Coastal must immediately take action to minimize potential pollution or otherwise stop the noncompliance and correct the problem, and Coastal must immediately notify the appropriate Ecology regional office of the failure to comply. Coastal must then submit a detailed written report to Ecology, including specified details, within 5

days of the time Coastal became aware of the circumstances unless Ecology requests an earlier submission.

On information and belief, Coastal routinely violates these requirements, including each and every time Coastal exceeded the numeric effluent limitation, as specified section V, above, each and every time Coastal discharges illicit and/or non-stormwater discharges, as described in section VI to this notice of intent to sue, above, each and every time Coastal failed to comply with the corrective action requirements described in section IV of this notice of intent to sue, and each and every time Coastal discharged stormwater with levels of pollutants in excess of the Permit benchmarks, as described in Table 1, above. All these violations may endanger human health or the environment.

X. REQUEST FOR SWPPP.

Pursuant to Condition S9.F of the 2015 Permit, Waste Action Project hereby requests that Coastal Transportation, Inc. provide a copy of, or access to, its SWPPP complete with all incorporated plans, monitoring reports, checklists, and training and inspection logs. The copy of the SWPPP and any other communications about this request should be directed to the undersigned at the letterhead address.

Should Coastal fail to provide the requested complete copy of, or access to, its SWPPP as required by Condition S9.F of the 2015 Permit, it will be in violation of that condition, which violation shall also be subject to this notice of intent to sue and any ensuing lawsuit.

XI. CONCLUSION.

The above-described violations reflect those indicated by the information currently available to Waste Action Project. These violations are ongoing. Waste Action Project intends to sue for all violations, including those yet to be uncovered and those committed after the date of this Notice of Intent to Sue.

Under Section 309(d) of the CWA, 33 U.S.C. § 1319(d), each of the above-described violations subjects the violator to a penalty of up to \$37,500 per day for each violation that occurred through November 2, 2015, and \$53,484 per day for each violation that occurred thereafter. In addition to civil penalties, Waste Action Project will seek injunctive relief to prevent further violations under Sections 505(a) and (d) of the CWA, 33 U.S.C. § 1365(a) and (d), and such other relief as is permitted by law. Also, Section 505(d) of the CWA, 33 U.S.C. § 1365(d), permits prevailing parties to recover costs, including attorney's fees.

Waste Action Project believes that this NOTICE OF INTENT TO SUE sufficiently states grounds for filing suit. We intend, at the close of the 60-day notice period, or shortly thereafter, to file a citizen suit against Coastal Transportation, Inc. under Section 505(a) of the Clean Water Act for violations.

During the 60-day notice period, we would be willing to discuss effective remedies for the violations addressed in this letter and settlement terms. If you wish to pursue such discussions in the absence of litigation, we suggest that you initiate those discussions within 10 days of receiving this notice so that a meeting can be arranged and so that negotiations may be completed promptly. We do not intend to delay the filing of a complaint if discussions are continuing when the notice period ends.

Very truly yours,

SMITH & LOWNEY, PLLC
